ABSTRACT

This report presents educational data from a representative sample of United States public school systems. Data were obtained from a survey of local public school systems designed to include all school systems with enrollments of 5,000 or more and a stratified sample (by enrollment size) of the systems with fewer than 5,000 pupils. This is the fourth annual report in a series developed to fill a requirement for reliable quantitative financial data on individual local public school systems for planning, policy, and research purposes. Most tabular presentation analyses in this publication are organized by enrollment size of school systems, metropolitan status, region, and State. National estimates tables calculated from the figures supplied by the selected local public school systems contain the same data as the basic tables in summary form, and, in addition, supply for the systems as a whole, percent changes in receipt sources and expenditure account. Basic data tables list: (1) beginning balances and source of revenue receipts; (2) revenue receipts from federal sources, by program; (3) expenditures by purpose and ending balances; (4) current expenditures, by account; and (5) current expenditures per pupil in average daily membership (ADM), by account. Appendixes include sample design and selection, methodology and related data, and a reproduction of the survey report form. (Author/MLF)

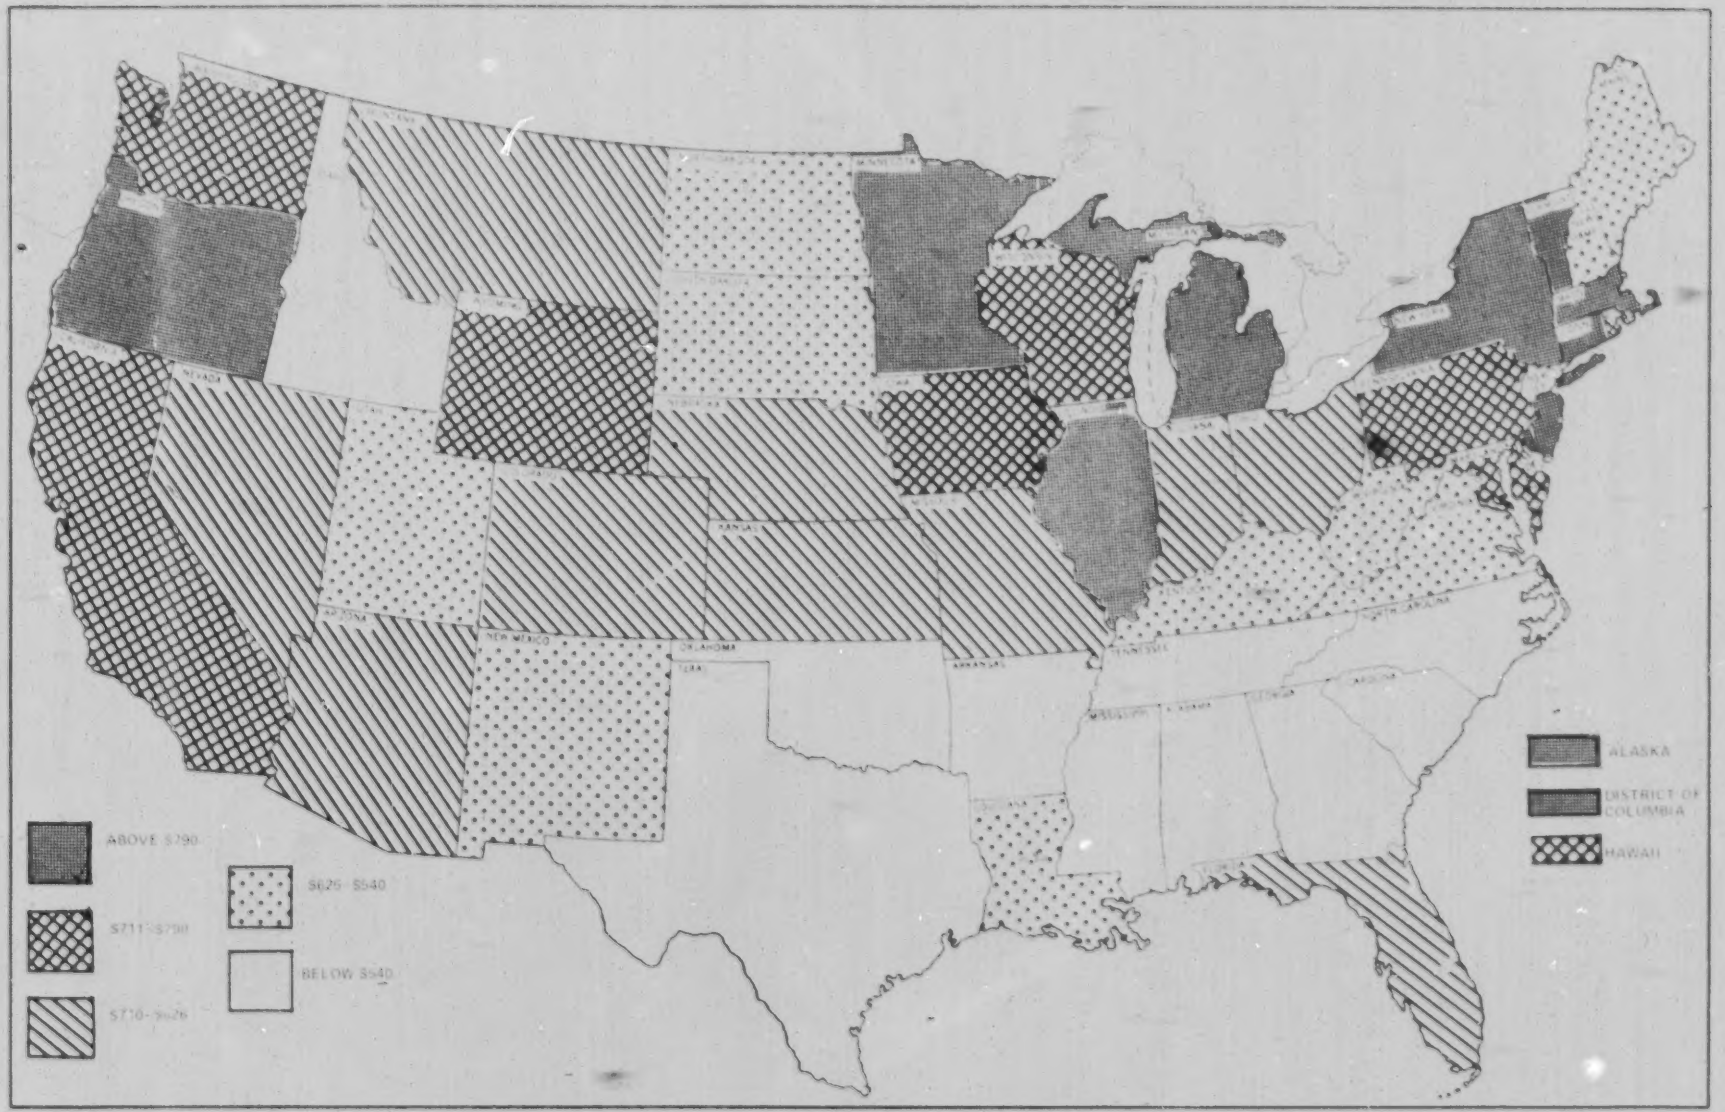
Current expenditures per pupil in average daily membership, by State: School year 1969-70



FOREWORD

This is the fourth annual report in a series on the finances of local public school systems prepared by the National Center for Educational Statistics (NCES). The series, a segment of the Elementary-Secondary General Information Survey (ELSEGIS), was developed to fill a requirement for reliable quantitative financial data on individual local public school systems for planning, policy, and research purposes. To this end, the data have been used by educational administrators at all levels of government—Federal, State, and local—as well as by organizations in the private sector.

The present survey differs from others in the ELSEGIS financial series, in that the sample from which the data were derived was designed to permit estimates by State, by enrollment size group, and by metropolitan status category. This was done so that the financial characteristics of local public school systems could be compared with demographic and socioeconomic data from the 1970 Census. Such comparative analyses are now in progress and will be released in a separate NCES publication.

The collection and editing phase of this survey was conducted in the Elementary and Secondary Surveys Branch by Gerald Kahn, assisted by Joanell Porter. Analysis and publication planning were done under contract by Measurement Research Center (MRC), a Division of Westinghouse Learning Corporation (WLC), and monitored by Mr. Kahn.

Our sincere appreciation is expressed to the Council of Chief State School Officers, State agency research and statistical personnel, and local school officials, with whose cooperation a 99 percent response rate was attained.

Roy C. Nehrt, Chief
Elementary and Secondary Surveys Branch

Dorothy M. Gilford
Assistant Commissioner
for Educational Statistics

Appendixes
- A. Sample Design and Selection 605
- B. Methodology and Special Notes 615
- C. Related Data 617
- D. Reproduction of Survey Report Form 619

CHART

Current expenditures per pupil in average daily membership, by State: School year 1969-1970 . . . . . Inside front cover

TABLES

National Estimates Tables

A. Beginning balances and revenue receipts of local public school systems, by enrollment size of school system, metropolitan status, region, and State: United States, 1969-70 4

B. Federal revenue receipts of local public school systems, by program, enrollment size of school system, metropolitan status, region, and State: United States, 1969-70 8

C. Expenditures of local public school systems, by expenditure account, enrollment size of school system, metropolitan status, region, and State: United States, 1969-70 12

D. Current expenditures of local public school systems, by expenditure account, enrollment size of school system, metropolitan status, region, and State: United States, 1969-70 16

E. Current expenditures of local public school systems per pupil in average daily membership, by expenditure account, enrollment size of school system, metropolitan status, region, and State: United States, 1969-70 20

F. Change in beginning balances and receipts of local public school systems, by receipt account: United States, 1967-68 through 1969-70 24

G. Change in expenditures of local public school systems, by expenditure account: United States, 1967-68 through 1969-70 24

Basic Data Tables

1. Beginning balances, receipts, and incoming transfers, with source of revenue receipts, for selected local public school systems in the United States: School year 1969-70 26
2. Revenue receipts from Federal sources, by program, for selected local public school systems in the United States: School year 1969-70 154
3. Expenditures by purpose, outgoing transfers, and ending balances, for selected local public school systems in the United States: School year 1969-70 282
4. Current expenditures, by account, for selected local public school systems in the United States: School year 1969-70 . . . 410
5. Current expenditures per pupil in average daily membership (ADM), by account, for selected local public school systems in the United States: School year 1969-70 538

Appendix Tables

i. Universe and sample, by State and enrollment size of school system within each State 606

ii. Coefficients of variation for estimates of receipt variables, by enrollment size of school system, metropolitan status, and region 612

iii. Coefficients of variation for estimates of expenditure variables, by enrollment size of school system, metropolitan status, and region 613

iv. Coefficients of variation for selected variables, by State 614

INTRODUCTION

The information contained in this publication concerns local public school system finances during the school year 1969-70. The Elementary-Secondary General Information Survey (ELSEGIS), of which this report is a part, is a cooperative annual venture of NCES and the Committee on Educational Data Systems (CEDS) of the Council of Chief State School Officers. The ELSEGIS system also includes data on pupils, staff, and media services, which will be covered in separate publications. The first report in the ELSEGIS series was based on a pilot survey and contained data for the school year 1966-67.[1] Subsequent surveys were ELSEGIS I, II, and currently ELSEGIS III for the school years 1968-69, 1969-70, and 1970-71 respectively.

Approximately 5,200 school systems were sampled for this survey. The ELSEGIS system was designed to collect as much of the required data as possible from the records of State education agencies (SEA's), and in 43 States and the District of Columbia data were provided by the SEA's. In the remaining seven States, the data were prepared by the local school system. In all, a 99 percent response rate was attained. In some States where data were not available, estimates were provided by the State or local system. In other instances, estimates were generated by NCES from published State reports.

Most tabular presentation analyses in this publication are based on the following controls:

1. Six enrollment-size groups, based on school system average daily membership (ADM) as determined by presample selection and design:[2]

   25,000 or more
   10,000 – 24,999
   5,000 – 9,999
   2,500 – 4,999
   300 – 2,499
   Under 300

   These categories are identical to those used in previous ELSEGIS publications and provide a stable basis for comparison over the ELSEGIS report series.

2. Three metropolitan-status categories:

   Metropolitan, central
   Metropolitan, other
   Nonmetropolitan

   A school system was regarded as "metropolitan" if it was located in a county defined as a Standard Metropolitan Statistical Area (SMSA). (In New England, SMSA's were determined on the basis of towns, rather than counties.) A school system located outside an SMSA was classified as "nonmetropolitan."

   Metropolitan systems were further defined as either "central" or "other" as follows:

   If coterminous with or located within the boundaries of a central city (the large city comprising the hub of the SMSA), it was classified as "metropolitan, central."

   If located within the SMSA but outside the central city, it was classified "as metropolitan, other."

   If, as in some large county-unit school systems, the population of a central city (1960 census) within the system was 50 percent or more of the county population, the system was regarded as "metropolitan, central"; if less than 50 percent, it was regarded as "metropolitan, other." For example, the Mobile County, AL, school system was classified as "metropolitan, central," because Mobile City made up 54 percent of the county population; but the Dade County, FL, system was placed in the "metropolitan, other" category because the central city of Miami accounted for only 31 percent of the county population.

3. Four regions of the United States:

North Atlantic	*Great Lakes and Plains*
Connecticut	Illinois
Delaware	Indiana
District of Columbia	Iowa
Maine	Kansas
Maryland	Michigan
Massachusetts	Minnesota
New Hampshire	Missouri
New Jersey	Nebraska
New York	North Dakota
Pennsylvania	Ohio
Rhode Island	South Dakota
Vermont	Wisconsin

[1] *Statistics of Local Public School Systems, 1967.*
[2] See appendix A, "Sample Design and Selection."

Southeast	*West and Southwest*	
Alabama	Alaska	Utah
Arkansas	Arizona	Washington
Florida	California	Wyoming
Georgia	Colorado	
Kentucky	Hawaii	
Louisiana	Idaho	
Mississippi	Montana	
North Carolina	Nevada	
South Carolina	New Mexico	
Tennessee	Oklahoma	
Virginia	Oregon	
West Virginia	Texas	

4. Fifty States and the District of Columbia:
   States are listed alphabetically within the appropriate regions as indicated above.

Some of the tables of national estimates also show a line identified as "Large-city systems, total." This line includes totals or ratios for a group of 91 school systems which are either coterminous or approximately coterminous with a central city of an SMSA. These city school systems were selected on the basis of the following criteria:

1. The system's enrollment is 25,000 or more.
2. At least 75 percent of the system's enrollment comes from a central city of an SMSA.
3. At least 75 percent of the public elementary and secondary school pupils in the city attend school in the system.

The financial data in the tables of national estimates are presented to the nearest thousand dollars. Because the data are estimates derived from a sample, they are subject to both sampling and nonsampling errors.

Listed below are the two-position State abbreviations adopted by the U.S. Postal Service and used in the basic data tables:

State	*Abbreviation*
Alabama	AL
Alaska	AK
Arizona	AZ
Arkansas	AR
California	CA
Canal Zone	CZ
Colorado	CO
Connecticut	CT
Delaware	DE
District of Columbia	DC
Florida	FL
Georgia	GA
Guam	GU
Hawaii	HI
Idaho	ID
Illinois	IL
Indiana	IN
Iowa	IA
Kansas	KS
Kentucky	KY
Louisiana	LA
Maine	ME
Maryland	MD
Massachusetts	MA
Michigan	MI
Minnesota	MN
Mississippi	MS
Missouri	MO
Montana	MT
Nebraska	NB
Nevada	NV
New Hampshire	NH
New Jersey	NJ
New Mexico	NM
New York	NY
North Carolina	NC
North Dakota	ND
Ohio	OH
Oklahoma	OK
Oregon	OR
Pennsylvania	PA
Puerto Rico	PR
Rhode Island	RI
South Carolina	SC
South Dakota	SD
Tennessee	TN
Texas	TX
Utah	UT
Vermont	VT
Virginia	VA
Virgin Islands	VI
Washington	WA
West Virginia	WV
Wisconsin	WI
Wyoming	WY

NATIONAL ESTIMATES TABLES

[1] Includes principal and interest of schoolhousing authority payments.
[2] Includes outgoing transfers, other expenditures, and revenue returned to the appropriating authorities.

Table D.--Current expenditures of local public school systems, by expenditure account, enrollment size of school system, metropolitan status, region, and State. United States, 1969-70
(In thousands of dollars)

United States and regions, by enrollment size, metropolitan status, large-city systems, total, and States within each region	Total current expenditures	Allocable to pupil costs											Other current expenditures
		Total allocable to pupil costs	Administration	Instructional expenditures					Attendance and health services	Pupil transportation services	Operation and maintenance of plant	Fixed charges	
				Total	Salaries			Other expenditures					
					Total	Professional	Non-professional

APPENDIX A

Sample Design and Selection

Sample Design

The population of inquiry for this survey comprised the approximately 17,400 local public school systems in the 50 States and the District of Columbia which operated schools during the school year 1969-70.

Among the factors affecting the sample design was the necessity to:

1. Provide highly reliable national estimates.
2. Provide reasonably reliable estimates for each of the following enrollment-size categories:
   a. 25,000 and over
   b. 10,000 – 24,999
   c. 5,000 – 9,999
   d. 2,500 – 4,999
   e. 300 – 2,499
   f. Under 300
3. Provide State estimates that would have approximately the same precision and confidence level for each State. That is, the number of school systems in the sample for any given State was to be of sufficient size so that the estimated total enrollment for that State would have a relative error of about 7.5 percent at the 95 percent confidence level.
4. Include all systems with enrollments of 5,000 or more.

It was anticipated that enrollment would be highly correlated with many other survey variables. Accordingly, 1969-70 ADM (or, where ADM was not available, ADA or another pupil count measure) was used as the design variable, and systems within each State were stratified by this measure of size. Because of the differences in the distribution of the school systems by size from State to State, the enrollment-size categories shown above for which national estimates are presented did not constitute an efficient stratification in all cases for State estimates. To solve this problem a separate stratification pattern was devised for each State, providing additional stratification within enrollment-size categories for sampling purposes, where appropriate. The sampling strata boundaries for each State are shown in table i.

Within each stratum, the sample selection procedure used entailed the ranking of the systems by size, and sampling with a random start. A separate random start was used for each enrollment-size stratum in each State.

Estimates of Totals

For estimating totals, the figures for each reporting school system were inflated by the reciprocal of the sampling rate in the stratum from which it was selected, adjusted for nonresponse.

There were a few instances of closed sample districts indicating errors in the universe. Where this occurred, adjustments were made to the universe and the sample, with the type of adjustment depending on the best information available. Two alternative adjustment procedures used were as follows:

1. It was assumed that the closed districts in the sample represented the closed districts in the universe. This was done in the following States:

State	*Stratum*	*Reduction in sample*	*Reduction in universe*
Nebraska	Under 300	1	15
South Dakota	Under 300	2	15

2. Where the procedures described in 1., above, would result in unreasonably low universe figures, both the sample and universe were reduced by the number of closed sample districts, as follows:

State	*Stratum*	*Reduction in sample and universe*
Maine	300 – 1,999	1
Maine	Under 300	2
Massachusetts	Under 300	1
Missouri	Under 300	1
Texas	300 – 2,499	1
Vermont	Under 300	3
Wyoming	600 – 2,499	1

Estimates for the school systems in the "under 300" stratum for the five States shown below, where there was no sample coverage, were obtained from the comparable stratum from another State that was matched on the basis of region and of average ADM by the following formula:

$$x'_{so} = \frac{\Sigma x_{sp}}{n_{sp}} \quad N_{so}$$

Where:

x_{so} = estimated cell total for State not having sample coverage

Σx_{sp} = sample total for a variable for the comparable stratum from a matching State

n_{sp} = number of sample cases in the stratum for the matching State

N_{so} = number of systems in the universe for the State not having sample coverage.

State	Number in universe	Matching State
Georgia	1	Arkansas
Mississippi	1	Arkansas
Ohio	6	Indiana
Tennessee	1	Kentucky
Utah	2	California

Table i shows the number of systems in the universe and the selected sample by size group within each State. It also presents the number of respondents and nonrespondents, and the inflation factor used after adjusting for nonresponse.

Sampling Reliability

Because the figures in this report are estimates derived from a sample, they are subject to sampling variability. As a guide to users of the data, approximate measures of the sampling reliability of the survey estimates are presented in tables ii, iii, and iv. Tables ii and iii give the coefficients of variation for estimates of selected receipts and expenditure variables, respectively, by enrollment size, metropolitan status, and region; table iv gives coefficients of variation for selected variables by State. The chances are about 2 out of 3 that the percentage difference between an estimate and the figure that would have been obtained from a complete canvass of all school systems using the same survey forms and procedures would be less than the limit of error specified in the table. Similarly, the chances are about 19 out of 20 that the percentage difference would be less than twice the specified limit of error, and about 99 out of 100 that it would be less than 2.5 times the specified limit. An illustration of the use of the sampling variability tables follows:

> The national estimate of the amount of money local school systems expend for transportation services is $1,214,770,000 (table C). The relative sampling error given in table iii is 0.6 percent or $7,289,000. In applying the probabilities described above, the chances are about 2 out of 3 that the figure of $1,214,770,000 would not differ by more than $7,289,000 from the results of complete coverage of all school systems.

The coefficient of variation does not reflect response biases or systematic errors that may have been incurred in the data handling processes such as would be applicable even if there were complete coverage of all school systems. However, concerted effort was made to minimize such errors through editing and followup procedures.

APPENDIX B

Methodology and Special Notes

Survey Methodology

Data for this report were transmitted on a standard survey form (appendix D) developed by NCES staff in consultation with the Council of Chief State School Officers' Committee on Educational Data Systems (CEDS). Preaddressed and coded forms for the local school systems included in the sample were mailed to the research and statistics department in each State education agency. States had the option either of providing the data from records already existing in their own files, or of forwarding the form to the local school systems for completion. All but seven States were able to compile the reports from their own records.

To assure maximum comparability, the items and their definitions were designed to agree wherever possible with the categories and terminology of the United States Office of Education Handbook II—*Financial Accounting for Local and State School Systems.*

A computer edit program was developed to detect serious reporting problems. Despite the increasing use of Handbook II, many variations in recording and accounting methods still prevail among the State and local school systems. As a result, the computer checks turned up numerous apparent reporting problems. Every effort was made to secure data comparable from State to State and school system to school system. Remaining serious discrepancies or gaps in the data are indicated by footnotes in the basic data tables.

Explanation of Data

Item definitions are given in the instructions to the survey form (appendix D). Some important explanations and limitations are given below:

Balances on hand at beginning and end of year. Some fiscally dependent systems do not carry balances because at the end of the fiscal year all unspent funds revert to the government unit of which the school system is a part. Balances do not necessarily indicate an excess of income over expenditures, because they usually are obligated for special purposes.

Revenue receipts from State sources. These do not include Federal funds distributed through the State education agency. Respondents were asked to include as State receipts the school-purpose contributions that, in some States, do not go through the books of the local school system; e.g., State contributions to employee retirement and textbooks furnished by the State. In many instances, the value of such contributions was estimated.

Revenue receipts from Federal sources. These include funds from Federal programs going to local school systems either directly or through the State as a distributing agency. Not included is the amount for Federal programs going to agencies other than the local public school system; e.g., that part of ESEA Title I dealing with programs for State-operated or -supported schools for the handicapped. For the most part, the receipts reported here are those recorded as receipts in the school system's regular accounting procedures. They are not official U.S. Office of Education or State education agency figures on allotments or disbursements.

ESEA Title III. Sometimes more than one school system shared in a Title III project. Where this occurred, Title III receipts were sometimes reported only by the system receiving the funds.

Head Start and Follow Through. The data in this survey include only the Head Start and Follow Through programs operated directly by the local public school system. Programs operated by the school system on behalf of another agency or by a nonschool agency are not included.

Vocational education. In some cases, the distribution of vocational education funds by source; i.e., Federal versus State receipts, was estimated.

National School Lunch and Special Milk Programs. The data in this report include financial assistance only; they exclude the value of donated commodities.

Incoming and outgoing transfers. These are shown in the basic data tables, but are excluded from the national estimates. Because incoming transfers of a given school system were also reported as receipts by the transferring school system, they would represent a duplication of total receipts at the national level. Similar duplication occurs on the expenditure side when the outgoing transfers of the transferring school system are also reported as expenditures by the receiving system.

Current expenditures allocable to pupil costs. These are the accounts listed under this heading in tables 4 and D, which, because of their direct relationship to the education program, were recommended in Handbook II for use in the determination of current expenditures per pupil.

Food services and student body activities. Data for these categories were requested in terms of net expenditures. For food services, this means gross expenditures less cafeteria

sales; for student body activities, it means gross expenditures less fees from athletic events or other activities for which admission was charged.

Payments to schoolhousing authority. These payments, by principal and interest, are shown in table 3 under debt services. States and school systems had difficulty distributing these payments into principal and interest, because the selling of bonds and payment of principal and interest were actually done by the schoolhousing authorities. In some cases, these quasi-public corporations actually own the school property and the "debt service" payments made by the local school systems are technically rent payments which include, in effect, principal, interest, and authority overhead. In other cases, the local school system will own the property when all payments are made. Wherever possible, estimates of the distribution were obtained; where such a distribution was not feasible, the entire payment was placed in the column labeled "principal." In tables C and G, these payments have been combined with principal of debt and interest on debt in order to obtain better national estimates of these accounts.

Further Considerations in Use of Data

In addition to the data limitations just cited, the users of the data who are interested in making direct comparisons between individual school systems should be guided by the following considerations:

1. The State education agencies and the local school systems were encouraged to provide reasonable estimates where precise data were not available. Comparisons between individual school systems may be affected to the extent to which they involve such estimates.
2. A complex of factors may be involved in the explanations of observed differences. Thus, there are instances in which a school system will compare unfavorably with another in terms of a given statistical indicator when it may be an equal or superior system. For example, suppose school system "X" makes considerably higher expenditures per pupil than system "Y." On the surface, system "X" appears to be devoting more resources to education. Further investigation may indicate, however, that there are reasons for the differences which are not directly related to educational output. For example, although having a generally lower pay scale than system "Y," system "X" may have a much higher proportion of older teachers drawing salaries near the top of the scale; the higher salaries, in turn, will lead to higher teacher retirement payments. This may result in a higher general level of expenditures without necessarily a higher general level of support for public education or a superior program.

APPENDIX C

Related Data

In addition to this study, which is designed to collect data on individual school systems as well as to provide national estimates, NCES conducts three surveys from which national financial statistics are derived. In each of these three surveys, data are collected in the form of State aggregate reports. That is, educational research and statistics staff in each State summarize local school system data and send NCES a composite State report.

The State elementary and secondary school statistics survey, taken biennially, covers comprehensive data on public school organization, staff, pupils, and finances. The report, *Statistics of State School Systems, 1969-70,* is now in preparation.

The fall report of membership and teachers conducted annually, early in the school year, includes a supplemental section requesting estimates of four broad expenditure categories for the school year. *Statistics of Public Schools, Fall 1969* presents this information for the school year 1969-70.

An annual survey of current expenditures made by local education agencies for free public elementary and secondary education is conducted to establish the average per-pupil expenditure in a State as required for the administration of Title I of Public Law 89-10 (Elementary and Secondary Education Act of 1965) and Title I of Public Law 81-874 (School Assistance in Federally Affected Areas). A resulting publication *Current Expenditures by Local Education Agencies for Free Public Elementary and Secondary Education, 1969-1970,* covers the same time period as this report.

The biennial survey and the fall report include data on finances of intermediate administrative units and of State education agencies; the current expenditure survey does not.

Because of differences in purpose, coverage, and method of data collection, estimates in the present publication will differ from figures for the same or similar variables presented in the other OE publications.

At present, two series of reports containing data on local public school systems are published from the Elementary-Secondary General Information Survey (ELSEGIS)—the series on financial data which includes the present report, and the series on personnel data.[1] Although it is the ultimate aim of ELSEGIS to integrate personnel and financial data, this goal has not yet been achieved. In the developmental years of the survey, emphasis was placed on the attainment of reliable data and estimates for the separate parts, rather than on the integration of the two parts. Consequently, the two series must be treated as separate and independent entities. Thus, if estimates on staff from the report *Statistics of Local Public School Systems, Fall 1969: Pupils and Staff* are to be analyzed in relation to financial estimates from the present publication, such analyses must be made with caution, recognizing the following limitations:

1. Although the reports are intended to cover the same year, 1969-70, the samples from which estimates are derived were selected from different populations. The sample for the staff survey was selected from the fall 1969 universe of local public school systems, while that for the present financial survey was selected from the fall 1970 universe. Because personnel data are usually available early in the school year, but financial data are frequently not available until 9 months after the close of the school year (resulting in a lag of about 1½ years) the survey package developed consisted of a personnel part covering the current year and a financial part covering the previous school year. Each part had the same sample drawn from the same universe. Thus, the survey package popularly known as ELSEGIS III covered personnel data for fall 1970 and financial data for the school year 1969-70. On the other hand, the fall 1969 personnel data, which is for the same year as the ELSEGIS III financial data, was collected in ELSEGIS II with a different sample drawn from an earlier universe. For future surveys, steps are being taken to make the estimates of personnel and financial data for the same year more compatible. The ELSEGIS IV personnel survey and the ELSEGIS V financial survey will be based on the identical sample which was drawn from the fall 1970 universe.

2. In most State education agencies, personnel data are collected and kept separate from financial records and are sometimes maintained in different parts of the agency. Therefore, the two ELSEGIS parts are frequently prepared by different personnel.

[1] *Statistics of Local Public School Systems, Fall 1970: Staff* was published in 1973. *Statistics of Local Public School Systems, Fall 1969: Pupils and Staff* was published in 1971.

ELEMENTARY-SECONDARY GENERAL INFORMATION SURVEY
of
Public Elementary-Secondary School Systems

ELSEGIS – III
PART B - FINANCES: SCHOOL YEAR 1969-70

This is the financial part of ELSEGIS III, the third annual Elementary-Secondary General Information Survey conducted by the U.S. Office of Education with the cooperation of the Committee on Educational Data Systems (CEDS) of the Council of Chief State School Officers. The sample of local public school systems is the same as the one reporting in ELSEGIS IIIA, Staff: Fall 1970.

Data from previous ELSEGIS Surveys have been the only sources of detailed data on individual school systems. The National Center for Educational Statistics has made these data available to those interested in doing research with the aim of improving American education. Your cooperation in the continued success of this important survey series is very much appreciated.

In completing the items, please follow the attached instructions and refer to Handbook II, Financial Accounting for Local and State School Systems.

V. SCHOOL REFERENDUM	YES (1)	NO (2)	NA (3)
1. DID YOU HAVE A SCHOOL BOND REFERENDUM IN YOUR SYSTEM DURING THE 1969-70 SCHOOL YEAR?			
2. IF YOU ANSWERED YES TO LINE V1, WAS THE REFERENDUM APPROVED?			
3. DID YOU HAVE A REFERENDUM DURING THE 1969-70 SCHOOL YEAR INVOLVING AN INCREASE IN THE SCHOOL TAX RATE?			
4. IF YOU ANSWERED YES TO LINE V3, WAS THE REFERENDUM APPROVED?			

W. ATTENDANCE AND MEMBERSHIP, SCHOOL YEAR 1969-70 *(report to nearest whole number)*
1. AVERAGE DAILY ATTENDANCE *(ADA)*
2. AVERAGE DAILY MEMBERSHIP *(ADM)*

*Include in this column only expenditures for which receipts were not reported in items A-H.

Instructions for Completing OE Form 2350-2

ELEMENTARY-SECONDARY GENERAL INFORMATION SURVEY III, PART B, FINANCES

GENERAL INSTRUCTIONS

Data should be reported for the school year 1969-70.

Enter data into the proper field. DO NOT LEAVE ANY FIELD BLANK. If there is no entry for a particular field, zero fill the data field. If precise data are not available, please provide your best estimate for the entry for that item and enter an "X" in the column provided.

In order to achieve maximum comparability, a second column has been set up to report expenditures for school purposes made by agencies other than the local school system. Include in this column payments made by nonschool agencies which are not entered on the books of the school system. Examples of such "expenditures by other agencies" are:

a. Value of textbooks furnished by the State.

b. State or other contribution to employee retirement.

c. Health services provided by a public health agency.

d. Capital outlay payments made by county or municipal government.

Item definitions are, for the most part, condensations of those given in Handbook II, Financial Accounting for Local and State School Systems. Please refer to Handbook II if necessary.

SPECIFIC INSTRUCTIONS

Item A. This item shows the school system opening balances at the beginning of FY '70. *(Enclose negative values in parentheses.)*

A1. Enter that part of the opening balance reserved for current operations.

A2. Enter the remainder of the opening balance set aside for building reserve and serial bond interest and redemption.

A3. Self-explanatory.

Item B. Revenue from local sources is revenue produced within the school system for operating the schools and available to the system in the amount produced.

B1. Enter revenue from taxes on all property, real and personal, as well as revenue received from licenses, taxes on utilities, sales and local income taxes, etc. Also, include any appropriations made to the school system by other agencies of local government.

B2. Enter all payments for tuition and transportation services.

B3. Enter all other revenue derived from local sources, e.g. rent received for use of school facilities, interest earned on investment, etc.

B4. Self-explanatory.

Item C. Enter revenue collected by an intermediate administrative unit, or a political subdivision between the school system and the State, and distributed to the school system in amounts different from those which were collected within the system. See Handbook II, pages 14 and 15 for additional explanation.

Item D. Enter all State money distributed to the school system through State support programs, grant programs, etc.

Item E. Revenue from Federal sources by Legislative Title.

E1 - E12. Self-explanatory.

E13. Enter funds received under the National School Lunch and Special Milk Programs. DO NOT include the value of commodities.

E14. Enter all other Federal revenue, including funds from titles administered by the Office of Education other than those listed in lines E1 - E13 above. Also include Federal revenue not listed above, administered by agencies other than the Office of Education. *(Model Cities, Manpower Development and Training, Economic Opportunity, etc.)*

E15. Self-explanatory.

Item F. Enter receipts from the sale of bonds, loans, sale of real property and equipment, and proceeds from insurance adjustments.

Item G. Enter the total amount received from other school systems for tuition, transportation, or other services rendered. Do not include transfers from other funds of your own school system.

Item H. Self-explanatory.

Item J. Self-explanatory.

Item K. Report current expenditures made during the school year 1969-70 from all funds regardless of source of funds. Separate direct expenditures made by the local system from those made by other agencies. If possible, report all expenditures made for school purposes by other agencies by purpose under the heading "other agencies." School systems which were not in operation in the school year 1969-70 *(including those which were newly organized or reorganized in 1970-71)* will have no financial records for 1969-70. Such systems should report on the basis of budget estimates for the school year 1970-71.

K1. (100 series) Enter expenditures for those activities which have as their purpose the general regulation, direction, and control of the affairs of the school system that are system wide and NOT confined to one school, subject, or narrow phase of activity. Include salaries, contracted services, and other expenses for administration.

K2a.(211-214) Enter salaries of professional instructional staff - teachers, principals, assistant principals, supervisors of instruction, guidance and psychological staff, librarians, and audiovisual staff.

K2b.(215-216) Enter salaries of nonprofessional instructional staff - teacher aides, secretarial and clerical assistants, and any others who aid the professional instructional staff.

K2d.(220-250) Enter expenditures for the textbooks furnished free to pupils, including the value of textbooks provided by the State, school libraries and audiovisual materials, teaching supplies, the net cost to the school system of rented books, and other expenses for instruction.

K3. (300 series) Enter salaries and other expenses for those activities which have as their primary purpose the promotion and improvement of children's attendance at school.

K4. (400 series) Enter salaries and other expenses for physical and mental health activities *(other than direct instruction)* i.e., medical, dental, psychiatric, and nurse's services.

K5. (500 series) Enter salaries and other expenses for those activities which have as their purpose the conveyance of pupils to and from school or on trips for curricular or cocurricular activities, including salaries of drivers, mechanics, etc., contracted services of public carriers; replacement of vehicles, pupil transportation insurance; expenditures in lieu of transportation; and operation and maintenance of transportation equipment.

K6. (600 series) Enter salaries and other expenditures concerned with keeping the school plant open and ready for use.

K7. (700 series) Enter salaries and other expenditures for activities concerned with keeping the grounds, buildings, and equipment at their original condition of completeness or efficiency.

K8. (800 series) Enter expenditures of a generally recurrent nature which are not readily allocable to other expenditure accounts, including: employer contributions *(State or school system)* to employee retirement , insurance and judgments, rental of land and buildings *(EXCLUDING lease payments to authorities)* and interest on current loans.

K10. Enter the NET expenditures, if any, for food services operation, i.e., the gross expenditures, less the cafeteria sales. If the receipts from cafeteria sales equal or exceed expenditures, enter a zero on this line. Exclude the value of commodities donated by the U.S. Department of Agriculture.

K11. Enter the NET expenditures, if any, for such extracurricular activities as interscholastic athletics, entertainment, publications, and clubs. If any receipts from such activities exceed expenditures, enter a zero on this line.

K12. Enter expenditures for (a) services provided by the school system for the community, such as recreational activities, civic activities, public libraries operated by the school system, child care centers of the school system, welfare activities of the school system, services to nonpublic school pupils, etc., (b) summer schools, i.e., schools in session between the end of the regular school term and the beginning of the next regular school term. Include expenditures for summer Head Start programs operated as part of the school system's program, (c) adult education programs, and (d) junior college programs *(grades 13 and 14)* operated by the local public school system.

K13. Self-explanatory.

Item L. Include only those expenditures made directly by the local public school system.

L1. (1210-1220) Enter expenditures for the acquisition of sites, new buildings, and improvements to existing structures.

L2. (1230) Enter expenditures for NEW items of equipment.

L3. Self-explanatory.

Item M. Include only those expenditures made directly by the local public school system.

M1. (1310) Enter the amount expended to retire serial bonds, short-term and long-term loans, warrants, or bills.

M2. (1320) Enter the amount expended for interest on bonds, and short-term and long-term loans.

M3. (1330) Enter the amount paid into sinking funds which are to be used at some future date to retire term bonds.

M4a.(1340a) Enter the amount paid for principal to school housing authority or similar agency.

M4b.(1340b) Enter the amount paid for interest to school housing authority or similar agency.

M5. (1350) Enter expenditures for any expense incurred in connection with debt service not covered above. *(Exclude those connected with sale of bonds.)*

M6. Self-explanatory.

Item N. Enter those payments made to other school systems or administrative units for tuition and transportation.

Item O. Include here any expenditures not reported elsewhere on the form. This item should be used as infrequently as possible, i.e., only after careful scrutiny has revealed that a given expenditure is inapplicable to any of items K - M.

Item P. Revenues returned to appropriating authority. Include moneys received which for any reason were returned to the appropriating agency - Federal, State, or local.

Item Q. Self-explanatory.

Item R. Balances on hand at end of year.

R1. Enter the balance of all funds which will be available for the current operation of schools in the school year 1970-71, i.e., those balances not earmarked for the special purposes listed in the instructions for line R2.

R2. Enter the end-of-year balances set aside for: (a) new construction or modification of physical plant or (b) retirement of principal and payment of interest on serial bonds.

R3. Self-explanatory.

Item S. Self-explanatory.

Item T. Fiscal status of school system.

T1. Check here if the school system itself is a separate unit of government, i.e., it levies its own taxes, floats its own bonds, etc.

T2. Check here if the school system is regarded as an agency of a larger governmental unit *(e.g., county, municipality, or township)* and is dependent on that governmental unit for all major school appropriations.

T3. Check here if the school system levies its own taxes for current funds, but is dependent on another agency for the financing of capital outlay and/or debt service.

Item U. Assessed valuation and tax rate.

U1. Enter, to the nearest dollar, the total assessed value of all taxable property *(real and personal)* within the school system.

U2. Enter, to the nearest cent, the local tax rate per $1,000 of assessed value.

a. Systems with 2 or more subsidiary tax areas having differential rates should report the tax rate of the subsidiary area contributing the most to the total tax receipts.

b. Systems with differential tax rates for different types of property *(e.g., farmland, homes, personal property, etc.)* should report the type of property contributing most to the total tax receipts.

c. Fiscally dependent systems should report an estimate of that part of the total nonschool agency tax rate going for school purposes.

d. Systems which are fiscally dependent except for capital outlay or debt services should report the sum of (a) the school system's own tax rate for current expenditures and (b) an estimate of that part of the nonschool agency tax rate going for school capital outlay and debt service.

e. Report only local tax rates. DO NOT include rates used in the determination of State Allotments.

U3. Report the prevailing ratio *(estimate acceptable)* of real property assessed value to market value, expressed to the nearest tenth of a percent.

Item V. This item requests a "yes," or "no," or "not applicable" response to the question of school referendums. Place an "X" in each of the proper columns to indicate the status of school referendums in your system during the 1969-70 school year. Use the "NA" box if the floating of school bonds (line 1) or tax rate changes (line 3) do not require voter referendum.

Item W. Report Average Daily Attendance *(ADA)* and Average Daily Membership *(ADM)* in full-time elementary and secondary day schools in accordance with the formulas given below; exclude students in summer schools, adult education, or junior colleges. Report to the nearest WHOLE NUMBER.

$$\text{ADA} = \frac{\text{Annual aggregate days attendance}}{\text{Actual number of days taught}}$$

$$\text{ADM} = \frac{\text{Annual aggregate days attendance plus annual days absence}}{\text{Actual number of days taught}}$$

A half-day nursery school or kindergarten should be counted as full time for purposes of determining average daily attendance and average daily membership. For example, if 100 pupils attended nursery school in the morning and a different group of 100 pupils attend in the afternoon, the aggregate attendance for the day would be 200.
